Miska Deaphon carried the mail.

This was in 1930 and 1931.

Miska had a team of twenty-one dogs.

They pulled his sled.

The sled carried 800 pounds of mail.

Miska's mail route was ninety miles long.

He went from Lonestar Road House to
Big River.

It took three days to go each way.

If the weather was bad, it took longer.

Miska was paid fifteen dollars a day.

That was very high pay.

In 1932, the airplane began to carry
all the mail.
